

d'Leedon

BLOCK 15 FLOOR PLAN

In d'Leedon, one of the world's most celebrated architects meets one of Singapore's most prestigious addresses. Designed by the award-winning Zaha Hadid Architects, 7 organic towers and 12 semi-detached Garden Villas rise from verdant gardens covering the site like large man-made trees. Being the only 36-storey residential development in a precinct surrounded by good-class bungalows, d'Leedon offers a panoramic view of Singapore that extends beyond the vicinity.

Away from the urban clutter, d'Leedon is the landmark that represents luxury of space and offers breath-taking scenery of Botanic Gardens and Bukit Timah Nature Reserve. Strategically located in the heart of District 10, d'Leedon is also in close proximity to popular retail and lifestyle hubs such as Orchard Road, Dempsey Hill and Holland Village, as well as numerous renowned schools. At the doorstep of Farrer Road MRT station and conveniently connected to major expressways, the city is no more than minutes from home.

Expanding across a massive 8-hectare piece of land area, the landscape of d'Leedon is translated into five main bands with themes that parallel the existing alignments and the main axis of the development's premises. These spatial designs spread over 80% of the development are infused into the site, as well as connected to articulate a series of orientation lines. The unique landscape themes for these lines bring forth diverse experiences and changing ambiances throughout the whole site.

Each band is dedicated a unique character inspired by the wondrous and distinct components of mountain ecosystems: Rock, Forest, Water, Foothills and Meadow. This results in the bands having individualistic attributes and exuding different atmospheres, created by using a unique palette of plant species and paving surfaces. The spatial experience is further heightened through the arrangement, lighting and differing facilities. This first of its kind concept makes residing in d'Leedon memorable.

Note:

- a) Marble and granite are natural stone materials which offer no absolute uniformity in their veins, colour, tonality and pattern as these are natural characteristics arising from their varied mineral composition and impurities. Natural fissure lines, fossils and pigmentation can appear on the surfaces of polished marble and granite being a result of the formation process. While such material can be pre-selected before installation, this non-conformity cannot be avoided. Granite tiles are pre-polished before laying and care has been taken for their installation. However granite, being a much harder material than marble cannot be re-polished after installation. Hence some differences may be felt at the joints. Subject to Clause 14.3, the tonality and pattern of the marble or granite selected and installed shall be subject to availability.
b) Timber strips are natural materials containing veins and tonality difference. Thus it is not possible to achieve total consistency of colour and grain in its selection and installation.
c) Layout/Location of wardrobes, kitchen cabinets, fan coil units and all electrical points are subject to Architect's sole discretion and final design.
d) Choice of brand and model of fittings, equipment, installation and appliances supplied shall be at the sole discretion of the Vendor.
e) Regular maintenance by the Purchaser of the air-conditioning systems, including the cleaning of filters and condensate pipes, is essential for efficient running and prolonging their operating life.
f) For the web portal of the Housing Project, the Purchaser will have to pay for annual fees, subscription fees or any such fees to the service provider of the portal as may be appointed by the Developer or Management Corporation when it is formed.
